23	3:20 p.m.-3:40 p.m.	2	firing	hazy with occasional showers
	4:20 p.m.-4:27 p.m.	2	firing	

On 24 and 25 April, no firing was observed. Between 26 April and 4 May, there was no flying or firing practice.

2. Recently, the jet fighters have approached the ground target from a higher altitude than previously. The planes circled once over the field at an altitude of 1,000 to 1,200 meters and approached the target at an angle of about 45 degrees according to the wind direction. Firing started at an altitude of 200 to 300 meters. Two to four rounds were fired with one aircraft cannon. The approach flights frequently missed the targets and then no rounds were fired. No auxiliary fuel tanks or bombs were observed on the planes. Although the range was guarded by VP, source entered the field on 6 April and observed that the contours of two aircraft were cut into the grass cover. The targets had a wing span of 25 to 30 meters. The turf between the two planes and around them was damaged by hits.
3. No ground detail was permanently stationed at the field. Source could not observe whether there was vehicular traffic on the field on those days when air-to-ground firing was practiced. *

25X1A * Comment. Barth airfield is used as a firing range by the two fighter regiments stationed in Puetnitz.
